

Alimak Hek & IPAF

~ double celebrations!

*Whilst IPAF celebrate their 25th anniversary
Alimak Hek UK celebrates 40 years!*

In 1968 Alimak Hek UK was born. Fast forward to 1983 at the formation of IPAF and Alimak Hek were already gaining a significant reputation for supplying safe, efficient vertical access solutions. We welcomed and contributed to the newly formed International Powered Access Federation and have celebrated its growth over 25 years and are delighted to be key members of IPAF.

Alimak Hek UK's anniversary is made even sweeter because the Alimak Hek Group is able to combine its specialist knowledge and years of experience unmatched by any other company anywhere in the world.

The results of this can be seen in our New HEK Modular System, our most technically advanced and innovative range of mast climbing work platforms, transport platforms and material hoists ever produced. The modular design allows the major components to be combined in a variety of configurations, whilst the compatibility of the masts allow most products including our Scando range of construction hoists to be combined delivering unprecedented flexibility for the user and significantly reducing the cost of ownership.

The Alimak Hek Group also provides its customers with dedicated IPAF Training Centre's in the UK, Germany, Holland and Italy where a complete range of mast climbing work platform training is provided.

The combination of being global and local means Alimak Hek UK can continue to provide our UK customers with world class products together with the exceptional levels of service and support expected in the UK marketplace.

**If you need to make contact with Alimak Hek UK in our 40th anniversary year there's no need to send an anniversary card!
